

	<p>'ROCK ANCHORS'</p> <p>Climbing and Mountaineering Equipment</p>	<p>UIAA</p> <p>123</p>
<p>Foreword</p>		
<p>This UIAA Standard is only published in the English language version, which is the master text. For any validations in translation, the UIAA Safety Commission should be contacted via the UIAA Office in Bern, Switzerland.</p>		
<p>UIAA Standards are the only 'globally recognized' standards for mountaineering equipment. In order to prevent multiplicity, the UIAA collaborates with its partner in standardization CEN; and bases UIAA standard 123 on the European Standard EN 959:2018. The EN Standards in turn are based on the original UIAA Standards, the first of their kind in the world. Additionally the UIAA publishes pictorials for each of the standards in a user-friendly way. This UIAA Standard 123 also has additional requirements over and above those in EN 959:2018.</p>		
<p>Owing to copyright restrictions, this UIAA Standard does not state the full requirements of EN 959:2018 to which it refers. Hence it is necessary to obtain a copy of EN 959:2018. The procedure for purchasing the EN Standards is included at the end of the text of this standard. The UIAA Standards are reviewed at intervals to see whether they meet the latest technical requirements and revised if necessary.</p>		
<p>The UIAA invites manufacturers of mountaineering and climbing equipment worldwide to become members of the UIAA Safety Commission as Safety Label Holders. Members can participate in discussions on standard requirements, test methods and revisions thereof (see the "General Regulations for the UIAA Safety Label").</p>		
<p>A complete list of UIAA Standards for mountaineering and climbing equipment can be found on the UIAA website.</p>		
<p>The UIAA Safety Commission, which is responsible for the UIAA Standards, expects that the corresponding EN Standard will be updated to include the additional requirements of the UIAA Standard.</p>

Copyright and Version Management

This document was first published in English. The English master text is decisive in any conflict of interpretation. For any validations in translation the UIAA should be contacted via the UIAA Office in Bern, Switzerland.

UIAA declarations, standards, documents and guidelines are subject to review. Updates are recorded in the version details stated on the front page of this document.

UIAA documents are generally produced by the responsible Commission and are subject to approval in accordance with the UIAA Articles of Association.

All UIAA documents can be found on the relevant subject area on the UIAA website.

This publication may be reproduced by UIAA member federations in any form for non-profit or educational purposes, providing that the source is acknowledged. **Other parties are requested to contact the UIAA office for permission.**

No use of this publication may be made for resale or any other commercial purpose whatsoever without the prior permission in writing from the UIAA.

Copyright is secured for the present document including all its parts. Any use beyond the limit of the copyright act is forbidden. Copyright of photos and pictorials belong to the UIAA or according to specific credits mentioned.

The Version number refers to the latest revision, e.g. V4 is the fourth change to the document. The last update is the date of this latest version.

1. General Remarks on the UIAA Trademark and UIAA Label

- 1.1. The UIAA Trademark (see section 5.1.) is copyright protected internationally. The UIAA Label is only given to items of mountaineering and climbing equipment upon approval of prospective label holder's application from the UIAA.
- 1.2. The procedure to be followed by a manufacturer, when applying for a UIAA Label, is laid down in the "General Regulations for the UIAA Safety Label Certification".

2. Requirements for Rock anchors

- 2.1. The UIAA Label can only be granted for bolts which meet all the requirements of EN 959:2018, with the following exception:
 - 2.1.1. No EN number required.
- 2.2. For the award of the UIAA Label, the following additional safety requirements shall be met:

Design:

 - 2.2.1. The embedded part of any rock anchor held in place by a chemical bonding agent shall have deformations or roughness, intended to prevent extraction or rotation.
 - 2.2.2. When tested in accordance with 3.3 all types of rock anchors shall have an axial load bearing capacity of 20 kN.
 - 2.2.3. When tested in accordance with 3.4 all types of rock anchors held in place by a chemical bonding agent shall withstand a torque of 150 N-m for 60(0/+5) seconds without rotating in the hole.

3. Test Methods

- 3.1. Check by visual examination that the requirements according to 2.2.1 are met.
- 3.2. Carry out an axial load test on a rock anchor of any type in accordance with the test methods in the relevant parts of EN 959:2018.
- 3.3. Carry out a torque test on a rock anchor of any type by applying a torque of 150 N-m to the eye of the rock anchor.

4. Demonstrating that the Requirements are met

- 4.1. The requirements of section 2.1 shall be satisfied by a test report from a UIAA-approved test laboratory.
- 4.2. The requirements of section 2.2 shall be satisfied by a test report from a UIAA-approved test laboratory.

5. Information to be supplied

5.1. The "information to be supplied" shall be given in Standard English and, if required, in the official language(s) of the country in which the product is made available on the market. As an alternative to a printed form, the information may be provided via an electronic or other data storage format link (e.g. a QR code) allowing the downloading of the information. The information link shall be preceded or surmounted by an icon showing an open booklet; the information link and icon may be directly printed on the product in a clearly visible and accessible place.

6. Attachment of the UIAA Label

6.1. For any model of mountaineering equipment, which has been awarded the UIAA Label, the UIAA recommends that the UIAA Trademark (see below) or the four letters "UIAA" be marked clearly and indelibly on each item sold in accordance with the branding guidelines specified in the "General regulations for UIAA Safety Label".

6.2. In addition, the UIAA Trademark or the four letters "UIAA" may be included in the instructions for use and/or on a swing ticket as well as in catalogues and other publications of the manufacturer. In the last case, the illustration and/or the text must clearly apply only to the equipment which has been awarded the UIAA Label.
