**Note:** the price of accreditations is based on the amount of time required to conduct a field visit. For member federations a "Routine approval" system for subsequent accreditations is normally available in order to reduce costs. This is based on a lower risk activity level (e.g bronze/silver) combined with a similar activity type contained with the existing accreditation (e.g. High Alpine accreditation already includes summer walking and rock climbing elements). For external applicants a field visit is always required.

\*Routine approval;

Holders of Silver validation generally don't require field visit for bronze validation in same activity type.
